ISTANBUL (Turkey), October 3 (SeeNews) – Turkish commercial vehicles maker Karsan Otomotiv [BIST:KARSAN] said on Friday it has become a subcontractor for a consortium made up of U.S. firms Nopetro LLC and Obrascon Huarte Lain.

The tie-up has placed a bid in a tender called by the Miami local authorities for the supply of 300 units of 12-metre compressed natural gas-fuelled buses. The tender procedure will be completed in the first half of 2015, Karsan said in a bourse filing.

Karsan manufactures and sells commercial vehicles and provides industrial services at its plant in the western Turkish city of Bursa. The company is a subsidiary of local vehicles and spare parts maker Kiraca Holding.
